1. Testflight installation

If you have the Testflight app already installed, you can skip this chapter.

1. Go to <https://itunes.apple.com/nl/app/testflight/id899247664>

The appstore will open on the page for the TestFlight app.

2. Click the blue cloud icon to download the app. Enter your apple account password if asked. When installation is complete the cloud changes to the text 'OPEN'
3. Click 'OPEN' to open TestFlight.

4. Accept or refuse possible notifications and click the blue button 'Continue'.

TestFlight now has been installed.

2. RE OnSite installation

1. Go to <https://testflight.apple.com/join/xtUEsHpF>

TestFlight opens automatically, or the following website shows:

2. Click 'OPEN' to open RE OnSite in TestFlight if this does not happen automatically.

3. Accept the invitation and install the app.

If another version was already installed then permission will be asked to replace the old version.

4. RE OnSite has been completely installed now and will behave like a normal app. The app has an icon on the home screen. There is no need to use Testflight any further.
